Scott Shinn is a Certified Industrial Hygienist and Application Engineering Specialist with 3M’s Personal Safety Division. With more than 25 years of health and safety program management experience in the consulting, chemical manufacturing, and personal protective equipment manufacturing industries, Scott has strong knowledge of health and safety compliance requirements as well as diverse practical experience in health and safety program management. For the past fourteen years Scott has supported the development, selection and use of 3M’s personal protective equipment, with current primary focus on support of customers in the primary metal and heavy manufacturing industries. Scott holds a B.S. degree in biology, and M.S. degree in industrial safety and hygiene from the University of Minnesota-Duluth.

Stewart Ayrey has worked for 3M for over 21 years, the last 11 years in the PPE Technical Team (Personal Safety Division) as a specialist in both respiratory protective equipment product development as well as supporting end-users with the selection, use and fit testing of respiratory protective equipment. As part of 3M’s desire to closer align products and solutions with major customer industries and applications, Stewart’s role changed over a year ago to become the EMEA Technical Specialist for 3M’s range of PPE for the Heavy Manufacturing, Metals and Transportation markets in addition to become 3M’s specialist in products and safe working in Confined Spaces.
